NOTE: The information contained in this index has been compiled by Precision Airmotive LLC in an effort to provide a historical record of service information relating to the RS/RSA fuel controls. This information is based on the records available at the time of publication.

We will continue our efforts to locate information relating to our products. If you are aware of service information relating to these products which is not referenced in this index, or if you have any questions regarding the information in the index, we ask that you contact Precision Airmotive's Product Support Department at the above address.

WARNING: These manuals and other service publications have been written and updated to address the overhaul, rework, and repair of Precision Airmotive (or Bendix) fuel injection components. These Precision Airmotive manuals may only be used with parts manufactured by Precision Airmotive. The procedures, specifications, and tolerances contained within these manuals do not apply to parts manufactured by other replacement parts manufacturers under a separate FAA/PMA. Such non-Precision Airmotive parts are not authorized by Precision Airmotive for installation in the RS and RSA fuel injection systems, and may not be installed per these manuals, and such parts may not be used in conjunction with replacement parts manufactured by Precision Airmotive. Always refer to service publications published by the manufacturer of the FAA/PMA approved replacement parts when using those parts.

NOTE: Vertical black bands in the margin denote changes from the previous release.
